

Sail through your next audit.

Zimpatica Compliance Navigator

Zimpatica Compliance Navigator is an integrated GRC solution built on the Appian software platform that centralizes compliance activities to effectively mitigate risk and costly disruptions to your organization.

Centralize compliance activities.

Work across multiple frameworks to track requirements, controls, artifacts, and actions. Configure to established regulatory frameworks and international standards, or customize to internal business protocols.

Implement risk mitigation plans.

This solution's risk matrix scores each threat based on likelihood and impact and allows you to set mitigation plans. Track when and where incidents have occurred to implement corresponding plans.

Proactively manage risk.

Ensure oversight across compliance, incidents, third-party vendors, and company assets. Set systemic cadences on email alerts and tasks for stakeholders to easily manage and monitor enterprise risk.

Save time on audits.

Collaborate with auditors and grant them access to this solution or export your data to their systems. You'll control which compliance frameworks they view while speeding up their reviews.

"Zimpatica Compliance Navigator has reduced audit coordination time by 50%. All the evidence is available within the system for auditors to access. The proactive alerts ensure I can manage the complex requirements with minimal disruption to my operations duties." ~ Chief Operations Officer

Streamline coordination across departments for a holistic view of risk and compliance.
